System Name: Gohvan Construction system

Type of System: Complete Business Solution

In this deliverable we aim to ensure that all the system documentation (from Deliverable 00 up until Deliverable 04) is up to date, reconciled and complete. Deliverable 06 contains the System Requirements signed off by our client and the INF 370 module coordinator. This deliverable consists of the Final Validation of Requirements, a CRUD Matrix, Conversion Plan, Complexity Matrix, Project Related Issues as well as the Client and Team Sign off of the deliverable.

Deliverable Introduction

This document contains the updated, reconciled and complete documentation done by the Paralinear Team. This document also contains the CRUD Matrix illustrating the relationship between the screens in the Gohvan Construction system and the database. The conversion plan to install the system is addressed. The document will conclude with the sign-off by both the client, Michael van der Walt, and all the members of the Paralinear team.

Overview of the Project from Deliverable 00 to 07

Deliverable 00: Team & Client Information:

Deliverable 00 provides an overview of who our client is and the team members in the Paralinear team. A brief paragraph of what the team will aim to provide for the team's client. The contact details of the client and the team members will be present.

Deliverable 01: Project Proposal:

In this deliverable, the Paralinear team provided the project proposal of the Gohvan Construction System. The team did a full analysis of the background and history of the company, conducted the initial requirements gathering and the feasibility analysis of developing and implementing a new system.

Deliverable 02: Functional Specification:

The Paralinear team provided the complete functional specifications of the Gohvan Construction system, by providing the complete set of functional level use case diagrams, data flow diagrams, activity diagrams, along with the functional Data Model.

Deliverable 03: Prototype:

In this deliverable, the Paralinear team provided a complete prototype of the proposed system to be developed for the Gohvan Construction system

Deliverable 04: Technical Specification:

In this deliverable, the Paralinear Team provided the complete technical specifications of the Gohvan Construction system, including a complete set of technical use case diagrams, narratives, and data flow diagrams. The team also provided the physical data model of the system.

Deliverable 05: Internally Tested System:

In the Deliverable, the team provided a functioning system that was tested internally by the Paralinear team.

Deliverable 06: System Documentation:

The team will present the updated and final documentation for the system as a whole. This will include the complete system documentation from Deliverables 1, 2, 3 and 4 along with deliverable 6's complete validation table, CRUD matrix, conversion plan and project related issue.

Deliverable 07: Website/Repository:

In this deliverable, we aim to provide a complete static website that contains all the information of each deliverable as well as a brief overview about the Our Team, Our Client and the Gohvan Construction System.

System Requirements

Introduction:

This section contains the final required amended changes of the requirements for the proposed Gohvan Construction system. It will contain the amended requirements list and use case description for each subsystem and their corresponding use cases. This document is signoff by the client and course coordinator that states that they agree and approve the amended changes.

1. Complete set of final, Signed-off system requirements:

Final System Requirements: Gohvan Construction System (1 File)

Conclusion

This section contained the complete, final signed off requirements of the Gohvan Construction System developed by the Paralinear Team, which was signed off by our client, Michael van der Walt and the INF370 coordinator.

Complete Documentation

Introduction:

This section includes all previous deliverables from deliverable 00 up until deliverable 07. It also includes the Final System Requirements. These documents were updated, reconciled and completed

2. Completed Validated Documentation:

Please refer to the accompanying files for all of the system documentation of the Gohvan Construction System:

- Final System Requirements: Gohvan Construction System (1 File)
- Deliverable 00: Team and Client Information (1 File)
- Deliverable 01: Project Proposal (1 File)
- Deliverable 02: Functional Specifications (1 Files)
- Deliverable 03: Prototype (1 File)
- Deliverable 04: Technical Specifications (2 Files)
- Deliverable 05: Internally Tested System (Gohvan Construction System)
- Deliverable 06: This current Document (1 File)
- Deliverable 07: Gohvan Construction System Website/Repository (Repository)

Conclusion:

This section covered the complete list of system documentation for the Gohvan Construction system from the beginning of the project up to this date (the due date for Deliverable 5,6 &7).

Validation

Introduction:

This section in the deliverable displays the validation tables which represent every use case requirement and the data flows within, and which entities are being interacted with.

3. Complete Validation Table:

3.1 Quotation Subsystem:

1. Quotation Subsystem

Use Case No.	Use Case Title	Processes from Primitive Data Flow Diagram	Entities	Screens	Reports
1.1	Create Quote	1.1.1 Display Quote Screen Task (Angular)	None	Quote Screen	None
		1.1.2 Retrieve Line Item and Project Information Task (Angular .NET Core)	None	None	None
		1.1.3 Retrieve Company, VAT and Client Information (Angular .NET Core)	Company Information VAT Client	None	None
		1.1.4 Display Create Quote Screen Task (Angular)	None	Create Quote Screen	None
		1.1.5 Capture and Validate Details Task (Angular)	None		None
		1.1.5 ALT: Notification of Validation Error Task (Angular)	None	Validation Error Dialog	None
		1.1.6 Display Confirmation Modal Task (Angular)	None	Confirmation Modal	None
		1.1.7 Request confirmation of captured info Task (Angular)	None	None	None
		1.1.8 Save Quote Details Task (Angular .NET Core)	Client Quote	None	None
		1.1.9 Generate Excel Sheets Task (Angular)	None	None	None
		1.1.10 Notification of successful quote creation Task (Angular)	None	Successful Quote Creation Dialog	None
		1.1.10 ALT: Notification of unsuccessful quote creation Task (Angular)	None	Unexpected Error Dialog	None
		1.1.11 Create Excel Sheets Download Task (Angular)	None	None	Client Quote
1.2	Search Quote	1.2.1 Display Quote Screen Task (Angular)	None	None	None

		1.2.2 Capture Search Parameter Task (Angular)	None	None	None
		1.2.3 Validate Captured Details Task (Angular)	None	None	None
		1.2.3 ALT: Notification of Validation Error (Angular)	None	Validation Error Dialog	None
		1.2.4 Retrieve Search Results Task (Angular .NET Core)	Client Quote	None	None
		1.2.5 Populate Search Results Table Task (Angular)	None	None	None
		1.2.5 ALT: Notification of no quote found Task (Angular)	None	No quote found Dialog	None
		1.2.6 Display Selected Employee Task (Angular)	None	None	None
		1.2.6 ALT: Notification of display error encountered Task (Angular)	None	Unexpected Error Dialog	None
1..3	Delete Quote	1.3.1 Retrieve and Display Client Quote Task (Angular)	Client Quote	None	None
		1.3.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
		1.3.3 Delete Client Quote Task (Angular)	Client Quote	None	None
		1.3.4 Notification of Successful Deletion Task (Angular)	None	None	None
		1.3.4 ALT: Notification of Deletion Unsuccessful Task (Angular)	None	None	None
1.4	Capture Purchase Order	1.4.1 Display Upload Purchase Order Document Modal Task (Angular)	None	Quote Screen Upload Purchase Order Modal	None
		1.4.2 Capture Purchase Order Document Information Task (Angular)	None	None	None
		1.4.3 Validate Purchase Order Document Details Task (Angular)	None	None	None
		1.4.3 ALT: Notification of Validation Error Task (Angular)	None	Validation Error Dialog	None

		1.4.4 Display Confirmation Modal Task (Angular)	None	Confirmation Modal	None
		1.4.5 Save Changes to Client Purchase Order Table Task (Angular .NET Core)	Client Purchase Order	None	None
		1.4.6 Notification of successful upload Task (Angular)	None	Successful Purchase Order Upload Dialog	None
		1.4.6 ALT: Notification of unsuccessful upload Task (Angular)	None	Unexpected Error Dialog	None

3.2 Administration Subsystem:

2. Administrative Subsystem						
Requirement	Use Case No.	Use Case Title	Processes from Primitive Data Flow Diagram	Entities from ERD	Screen	Report
2.1 Create Health and Safety file	2.1	Create Health and Safety file	2.1.1 Display upload HS file screen task(Angular)	None	None	None
			2.1.2 Capture and validate inputted information task(Angular)	None	None	None
			ALT 2.1.3 Validation error message task(Angular)	None	Validation error message	None
			2.1.3 Display "Confirm upload HS file" modal task(Angular)	None	None	None
			2.1.4 Upload HS file task(Angular .NET Core)	Health and Safety	None	None
			2.1.5 Return to step task 2.1.1 (Angular)	None	None	None
2.2 Search Health and Safety File	2.2	Search Health and Safety File	2.2.1 Display "View HS file" screen task(Angular)	None	View HS file screen	None
			2.2.2 Capture and validate inputted information task in search bar(Angular)	None	None	None
			ALT 2.2.3 Validation error message task	None	Validation error message	None
			2.2.3 Retrieve HS file information task(Angular .NET Core)	Health and Safety, Health and Safety type	None	None

			ALT 2.2.4 HS file error information task	None	HS file error message	None
			2.2.4 Display "View HS file" screen task(Angular)	None	View HS file screen	None
2.3 Edit Health and Safety File	2.3	Edit Health and Safety File	2.3.1 Retrieve and display Health and Safety File details Task (Angular)	Health and Safety	Edit Health and Safety File	None
			2.3.2 Request and capture edited Health and Safety File info Task (Angular)	None	None	None
			2.3.3 Validate Captured Health and Safety File Details Task (Angular)	None	None	None
			2.3.4 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			2.3.4 Confirmation of updated Health and Safety File info Task (Angular)	None	None	None
			2.3.5 Update Health and Safety File info Task (Angular)	Health and Safety	None	None
2.4 Delete Health and Safety File	2.4	Delete Health and Safety File	2.4.1 Retrieve and Display Health and Safety File Task (Angular)	Health and Safety File	Delete Health and Safety File	None
			2.4.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
			2.4.3 Delete Health and Safety File Task (Angular)	Health and Safety File	None	None

2.5 Create Health and Safety type	2.5	Create Health and Safety type	2.5.1 Display "Create Hs file type" screen task(Angular)	None	Create Hs file type screen	None
			2.5.2 Capture and validate inputted information task(Angular)	None	None	None
			ALT 2.5.3 Validation error message task(Angular)	None	None	None
			2.5.3 Display "Confirm HS file type" modal task(Angular)	None	Confirm HS file type modal	None
			2.5.4 Create Hs file type task (Angular .NET Core)	Health and Safety type	None	None
2.6 Search Health and Safety type	2.6	Search Health and Safety type	2.6.1 Display "View HS file type" screen task(Angular)	None	View Hs file type screen	None
			2.6.2 Capture and validate inputted information task in search bar(Angular)	None	None	None
			2.6.3 Retrieve HS file type task(Angular .NET Core)	Health and Safety type	None	None
			2.6.4 Display "Searched HS file type" screen task(Angular)	None	Searched HS file type screen	None
2.7 Edit Health and Safety Type	2.7	Edit Health and Safety Type	2.7.1 Retrieve and display Health and Safety Type details Task (Angular)	Health and Safety Type	Edit Health and Safety Type	None
			2.7.2 Request and capture edited Health	None	None	None

			and Safety Type info Task (Angular)			
			2.7.3 Validate Captured Health and Safety Type Details Task (Angular)	None	None	None
			2.7.4 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			2.7.4 Confirmation of updated Team info Health and Safety Type (Angular)	None	None	None
			2.7.5 Update Health and Safety Type info Task (Angular)	Health and Safety Type	None	None
2.8 Delete Health and Safety Type	2.8	Delete Health and Safety Type	2.8.1 Retrieve and Display Health and Safety Type Task (Angular)	Health and Safety Type	Delete Health and Safety Type	None
			2.8.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
			2.8.3 Delete Health and Safety Type Task (Angular)	Health and Safety Type	None	None
2.9 Create Drawing type	2.9	Create Drawing type	2.9.1 Display "Create drawing type" screen task (Angular)2	None	Create drawing type screen	None
			2.9.2 Capture and validate inputted information task(Angular)13	None	None	None
			2.9.3 Display "Confirm drawing type" modal task(Angular)2	None	Confirm drawing type modal	None
			2.9.4 Create drawing type task(Angular .NET Core)2	Drawing type	None	None

2.10 Search Drawing type	2.10	Search Drawing type	2.10.1 Display "View drawing type" screen task(Angular)2	None	View drawing type screen	None
			2.10.2 Capture and validate inputted information task in search bar(Angular)2	None	None	None
			2.10.3 Retrieve Drawing type task(Angular .NET Core)2	Health and Safety type	None	None
			2.10.4 Display "View Drawing type" screen task(Angular)2	None	View drawing type screen	None
2.11 Edit Drawing Type	2.11	Edit Drawing Type	2.11.1 Retrieve and display Drawing Type detailsTask (Angular)	Drawing Type	Edit Drawing Type	None
			2.11.2 Request and capture edited Drawing Type info Task (Angular)	None	None	None
			2.11.3 Validate Captured Drawing Type Details Task (Angular)	None	None	None
			2.11.4 ALT: Notification of Validation error Task (Angular)	None	Invalid Notificatio n screen	None
			2.11.4 Confirmation of updated Drawing Type info Task (Angular)	None	None	None
			2.11.5 Update Drawing Type info Task (Angular)	Drawing Type	None	None
2.12 Delete Drawing Type	2.12	Delete Drawing Type	6.4.1 Retrieve and Display Drawing Type Task (Angular)	Drawing Type	Delete Drawing Type	None
			6.4.2 Display DeleteConfirmation Modal Task (Angular)	Delete Confirmat ion	Delete Confirmat ion	None

			6.4.3 Delete Drawing Type Task (Angular)	Drawing Type	None	None
2.13 Upload Formal Drawing	2.13	Upload Formal Drawing	2.7.1 Gui Display: "Upload formal drawing" screen task(Angular)	None	Upload formal drawing screen	None
			2.7.2 Capture and validate inputted information task(Angular)	None	None	None
			ALT 2.7.3 Validation error message task(Angular)2	None	Validation error message	None
			2.7.3 Display "Formal drawing upload" modal task(Angular)	None	Formal drawing upload modal	None
			2.7.4 Upload formal drawing task(Angular)	Drawing	None	None
2.14 Search Formal Drawing	2.14	Search Formal Drawing	2.14.1 Search Formal Drawing search parameter Task (Angular)	None	View Formal Drawing	None
			2.14.2 Validate search parameter Task (Angular)	None	None	None
			2.14.3 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			2.14.3 Retrieve Formal Drawing search parameter (Angular)	Drawing	None	None
			2.14.4 Return Formal Drawing Search results Task (Angular)	None	None	None
			2.14.5 Return Selected Formal Drawing Information Task (Angular)	Drawing	View Formal Drawing	None

			2.14.5 ALT: Notification of No Formal Drawing found Task (Angular)	None	Error Screen	None
2.15 Edit Formal Drawing	2.15	Edit Formal Drawing	2.15.1 Retrieve and display Formal Drawing details Task (Angular)	Drawing	Edit Formal Drawing	None
			2.15.2 Request and capture edited Formal Drawing info Task (Angular)	None	None	None
			2.15.3 Validate Captured Formal Drawing Details Task (Angular)	None	None	None
			2.15.4 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			2.15.4 Confirmation of updated Formal Drawing info Task (Angular)	None	None	None
			2.15.5 Update Formal Drawing info Task (Angular)	Drawing	None	None
2.16 Delete Formal Drawing	2.16	Delete Formal Drawing	2.16.1 Retrieve and Display Formal Drawing Task (Angular)	Drawing	View Formal Drawing	None
			2.16.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
			2.16.3 Delete Formal Drawing Task (Angular)	Drawing	None	None
			2.16.4 Retrieve and Display Formal Drawing Task (Angular)	Drawing	View Drawing screen	None
2.17 Upload second	2.17	Upload second cut drawing	2.17.1 Gui Display: "Upload second-cut drawing" screen task(Angular)2	None	Upload second-cut	None

cut drawing					drawing screen	
			2.17.2 Capture and validate inputted information task(Angular)2	None	None	None
			ALT 2.17.3 Validation error message task(Angular)3	None	Validation error message	None
			2.17.3 Display "second-cut drawing upload" modal task(Angular)2	Drawing	second-cut drawing upload modal	None
2.18 Search Second-cut Drawing	2.18	Search Second-cut Drawing	2.18.1 Search Second-cut Drawing search parameter Task (Angular)	None	View Second-cut Drawing	None
			2.18.2 Validate search parameter Task (Angular)	None	None	None
			2.18.3 ALT: Notification of Validation error Task (Angular)	None	Invalid Notificatio n screen	None
			2.18.3 Retrieve Second-cut Drawing search parameter (Angular)	Drawing	None	None
			2.18.4 Return Second-cut Drawing search results Task (Angular)	None	None	None
			2.18.5 Return Selected Second-cut Drawing Information Task (Angular)	Drawing	None	None
2.19 Edit Second-cut Drawing	2.19	Edit Second-cut Drawing	2.19.1 Retrieve and display Second-cut Drawing details Task (Angular)	Drawing	Edit Second-cut Drawing	None
			2.19.2 Request and capture edited Second-	None	None	None

			cut Drawing info Task (Angular)			
			2.19.3 Validate Captured Second-cut Drawing Details Task (Angular)	None	None	None
			2.19.4 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			2.19.4 Confirmation of updated Second-cut Drawing info Task (Angular)	None	None	None
			2.19.5 Update Second-cut Drawing info Task (Angular)	Drawing	None	None
2.20 Delete Second-cut Drawing	2.20	Delete Second-cut Drawing	2.20.1 Retrieve and Display Second-cut Drawing Task (Angular)	Drawing	View Second-cut Drawing	None
			2.20.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
			2.20.3 Delete Second-cut Drawing Task (Angular)	Drawing	None	None
2.21 Search As-built document	2.21	Search As-built document	2.21.1 Display "View As-built file" screen task(Angular)	None	View As-built file screen	None
			2.21.2 Capture and validate inputted information task in search bar(Angular)	None	None	None
			ALT 2.21.3 Validation error message task(Angular)4	None	Validation error message	None
			2.21.3 Retrieve As-built file task(Angular)	As-Built, Project	None	None
			2.21.4 Display "View As-built file" screen task(Angular)	None	View As-built file screen	As-Built

			2.21.5 Download As-built file task(Angular)	None	None	As-Built
2.22 Generate As-Built Document	2.22	Create As-Built Document	2.22.1 Retrieve project status task(Angular .NET Core)	Project	None	None
			2.22.2 Display "Create As-built" modal task(Angular)	None	Generate As-built modal	None
			2.22.3 Retrieve all As-built information task(Angular .NET Core)	Project	None	None
			2.22.4 Capture and validate inputted information task(Angular)	None	None	None
			ALT 2.22.5 Validation error message task(Angular)7	None	Validation error message	None
			2.22.5 Generate As-built document task(Angular)	None	None	As-built
			2.22.6 Display "Generated As-built" modal task(Angular)	None	Create As-built modal	None
			2.22.7 Display "View As-built" screen task(Angular)	None	View As-built screen	None
2.23 Edit As-Built Document	2.23	Edit As-Built Document	2.23.1 Retrieve and display As-Built Document details Task (Angular)	As-Built	Edit As-Built Document	None
			2.23.2 Request and capture edited As-Built Document info Task (Angular)	None	None	None
			2.23.3 Validate Captured As-Built Document Details Task (Angular)	None	None	None
			2.23.4 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None

			2.23.4 Confirmation of updated As-Built Document info Task (Angular)	None	None	None
			2.23.5 Update As-Built Document info Task (Angular)	As-Built	None	None
2.24 Delete As-Built Documen t	2.24 Delete As-Built Docume nt		2.24.1 Retrieve and Display As-Built Document Task (Angular)	As-Built	View As-Built Document	None
			2.24.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
			2.24.3 Delete As-Built Document Task (Angular)	As-Built	None	None

3.3 Construction Subsystem

3. Construction Subsystem						
Requirement	Use Case No.	Use Case Title	Processes from Primitive Data Flow Diagram	Entities from ERD	Screen	Report
3.1 Create TSS	3.1	Create TSS	3.1.1 Capture TSS detail Task (Angular/ionic)	Site Type	Create TSS screen	None
			3.1.2 Validate Captured details Task (Angular/ionic)	None	None	None
			3.1.3 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			3.1.3 Confirmation of details Task (Angular/ionic)	None	Confirmation Screen	None
			3.1.4 Save TSS details Task (asp.net Core)	Project, TSS Photos, Project Line Items, Project	None	None
3.2 Search TSS	3.2	Search TSS	3.2.1 Capture TSS search parameter Task (Angular)	None	TSS Screen	None
			3.2.2 Validate search parameter Task (Angular)	None	None	None
			3.2.3 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None

			3.2.3 Retrieve TSS search parameter (Angular)	TSS	None	None
			3.2.4 Return TSS search results Task (Angular)	None	None	None
			3.2.5 Return Selected TSS Information Task (Angular)	Project	None	None
			3.2.5 ALT: Notification of No TSS found Task (Angular)	None	Error Screen	None
			3.2.5(A) [ALT] Capture Add TSS request Task (Angular)	None	None	None
			3.2.5(B) [ALT] Capture Update TSS Request Task (Angular)	None	None	None
3.3 Edit TSS	3.3	Edit TSS	3.3.1 Retrieve and display TSS details Task (Angular/ionic)	Project, TSS Photos, Project Line Items	Edit TSS screen	None
			3.3.2 Request and capture edited TSS info Task (Angular/ionic)	None	None	None
			3.3.3 Validate Captured TSS details Task (Angular/ionic)	None	None	None

			3.3.3 ALT: Notification of Validation error Task (Angular)	None	Invalid Notification screen	None
			3.3.3 ALT Capture Submit TSS request Task (Angular)	None	None	None
			3.3.4 Confirmation of updated TSS info Task (Angular/ionic)	None	Confirmation Screen	None
			3.3.5 Update TSS info Task (asp.net Core)	Project, TSS Photos, Project Line Items	None	None
			3.3.6 Notification of successful save Task (Angular)	None	Success Notification Screen	None
			3.3.6 ALT: Notification of unsuccessful save Task (Angular)	None	Error Screen	None
3.4 Submit TSS report	3.4	Submit TSS report	3.4.1 Retrieve and display TSS information Task (Angular/ionic)	None	Edit TSS screen	None
			3.4.2 Confirmation of TSS information Task (Angular/ionic)	None	Confirmation Screen	None
			3.4.3 Submit TSS report	Project	None	None

			Task (asp.net Core)			
			3.4.4 Notification of successful Submission Task (Angular)	None	Success Notification Screen	None
			3.4.4 ALT: Notification of unsuccessful Submission Task (Angular)	None	Error Screen	None
3.5 Search Project	3.5	Search Project	3.5.1 Display Construction Dropdown Task (Angular)	None	Home Page	None
			3.5.2 Display "Search Project Page" Task (Angular and .NET Core)	Project	Search Project page (home screen)	None
			3.5.3 ALT Display Project page Task (Angular)	None	Project page	None
			3.5.3 Capture Project Search Criteria Task (Angular)	None	None	None
			3.5.4 Validate Project Search Criteria Task (Angular)	None	None	None
			3.5.5 ALT Display Validation error on search criteria Task (Angular)	None	Validation Error notification	None
			3.5.5 Capture Project Information Task (Angular and .NET Core)	Project	None	None

			3.5.6 ALT Display Search Error Task (Angular)	None	Search error notification	None
			3.5.6 Display Searched Project result Task (Angular)	None	Search Project page	None
			3.5.7 Display "Project Page" Task (Angular)	None	Project page	None

			10.3.6 Notification of successful save Task (Angular)	None	Success Notification Screen	None
			10.3.6 ALT: Notification of unsuccessful save Task (Angular)	None	Error Screen	None
10.4 Delete Client	10.4	Delete Client	10.4.1 Retrieve and Display Delete Client Task (Angular)	Client	None	None
			10.4.2 Display Delete Confirmation Modal Task (Angular)	None	Delete Confirmation	None
			10.4.3 Delete Client Task (Angular)	Client	None	None
			10.4.4 Notification of Successful Deletion Task (Angular)	None	None	None
			10.4.4 ALT: Notification of Deletion Unsuccessful Task (Angular)	None	None	None

Conclusion

This section has validated the system against the outlined requirements using the entities from the ERD, screens and reports.

CRUD Matrix

Introduction

The following section contains our system's CRUD matrix. This is used to identify the tables and their attributes in our database. It shows how each attribute is either Created (C), Read (R), Updated (U), or Deleted (D) by using the system's functionality.

4. Complete CRUD Matrix of the System

Please refer to Appendix A for this section.

Conclusion

The section above contained a detailed CRUD matrix for the Gohvan Construction System. It shows in detail how each attribute in the database is either Created (C), Read (R), Updated (U), or Deleted (D).

Conversion Plan

Introduction

The conversion plan is used to guide the implementation phase of the system development life cycle. This plan will specify the type of conversion to be followed. It will also include the conversion plan components, acceptance testing, installation of databases and the training system users will require.

5.1 Background Information

The current system in place at Gohvan Construction is a paper-based company. The current system lacks automation and is vulnerable to human error. The new system, developed by Paralinear Solutions, will help automate the day-to-day business functions of Gohvan Construction.

The Gohvan Construction System is an intranet that supports the required business functions.

- Gohvan Construction Website (intranet): This is the company's intranet used by the employees of Gohvan Construction. The website will be developed on Angular and hosted on Amazon Web Services.

5.2 Plan Components

Conversion Strategy

The conversion strategy that is best suited to Gohvan Construction's needs, is the Abrupt Cut-Over strategy. The Abrupt Cut-Over strategy suggested that on a set date the company's current paper-based system will stop and the implementation of the new system will take place. The Abrupt Cut-Over strategy is the best option for situations where there is no old system to be replaced. This means the time required to transition to the new system is significantly lower. However, this strategy comes with a high-risk factor as the new system may be incomplete.

Conversion Requirements

The following hardware, software and network requirements need to be met before commencement of the conversion plan can begin. These requirements are also available in Deliverable 4: Technical Specifications.

Hardware Requirements

CPU (Central Processing Unit)	intel CORE i3 2.4 GHz or faster processor
RAM (Random Access Memory)	Minimum of 6GB of RAM
Disk Space	Minimum Capacity of 256GB of SSD (Solid State Drive)
	Minimum Capacity of 1TB of HDD
HDD Speed (Hard Disk Drive)	5400 RPM hard disk drive
GPU (Graphics Processing Unit)	DirectX 9-capable video card (1024 x 768 or higher resolution)

Peripheral Devices	Mouse
	Keyboard
	Printer
Internet Connectivity	Ethernet Port
	Wi-Fi Connectivity
Minimum Internet Speed	10Mbps

Software Requirements

Operating System	Windows 10
Internet Browser	Google Chrome
Documentation Software	Microsoft Office (Word, Excel)
PDF Viewer	Adobe Acrobat Reader DC
Screenshot Software	Snip & Sketch

Network Requirements

Internet Connectivity	10Mbps Fibre Line
Web / Server Hosting	Support for MySQL, ASP.NET and domain

5.4 System Acceptance Test

The system acceptance test is a set of comprehensive tests performed on the final system before it is handed-over to Gohvan Construction. This test is made up of verification test, validation testing and audit testing.

Verification (Alpha) Testing

The Verification (Alpha) Test helps the team determine if the developed system fulfils the required functionality. This test is performed in a simulated environment with simulated data. By using a simulated environment and simulated data our team will be able to test the system in a more controlled setting. Testing the system's functionality helps the team identify any issues or missing functionality in the system. When an issue is identified, the team will need to fix the error and test the newly implemented changes.

Validation (Beta) Testing

The Validation (Beta) Test helps the team test the developed system in a live environment with real data. This will help the team ensure that the developed system is compatible in real world scenarios. The Paralinear team will focus on the following points:

- System Performance – Ensures that the system produces adequate throughput and has appropriate response time.

- Peak workload processing performance – Measures the system's performance during peak processing periods.
- Human engineering test – This test will measure the system's ease of use and assess its level of learnability.
- Methods & Procedures – The implementation of functions and procedures may vary to the initial plan. Modifications and adjustments should be made to the functions and procedures.

Audit Testing

Only once both Alpha & Beta Testing is complete, the team will perform an Audit Test. Performing an audit test will help the team confirm that the developed system is free of errors and is ready to be handed over.

5.5 Install Databases

During this phase the system's database needs to be installed and populated with the company's data. This data will be used to manage and process the business functions of Gohvan Construction. However, the current system that is in place is a paper-based system. This means the Paralinear team will capture and store all the necessary data in the installed databases.

5.6 System Access

The Gohvan Construction system is an online angular application. The database is hosted in Amazon Web Services. The system restricts user access to the database and system functionality. Users can only access the system when they are registered and logged in to the system. Once logged in, the user will have access to the system's functionality according to the user's associated access level.

5.6 Train System Users

System users will require training in order to be able to use the new Gohvan Construction system. As the previous business processes will not be supported in the new system. An extensive training manual will be compiled by the Paralinear Solutions team in the next deliverable (Deliverable 9). This training manual will support the system users if they should encounter difficulty or uncertainty when performing business functions.

Conclusion

This section covered the overview of the conversion plan of the Gohvan Construction System. This plan entails the required conversion strategy, testing, installations, as well as training and support.

Project related issues

Introduction

Not every project runs smoothly. The chances of running into issues, when developing a system, is a given. This section documents the issues the Paralinear team encountered during the 5th, 6th and 7th deliverable.

6.1 Project Related Issues

6.1.1 COVID-19 pandemic and nation lockdown

On the 26th of March 2020 South Africa was put on lockdown as the spread of the COVID-19 pandemic began ravaging the world. Due to the lockdown the Paralinear team faced an entirely new environment filled with unforeseen issues. The team would rely heavily on online communication channels such as Discord, WhatsApp and Google Meets. The pandemic also affected the academic year by reducing the duration. This in turn brought its own issues with time management.

6.1.2 Scope Creep

As the team began developing the system, we found inconsistencies in the system. This needed to be addressed and certain new functionalities were introduced to solve the issues.

6.1.3 Communication

The Paralinear team faced issues with communication the below points:

- Communication between Paralinear and our Client (Michael van der Walt) was affected due to the pandemic. Our client would also have his own issues to face during the pandemic and this would mean his priorities would have to take precedent. This would delay responses and prolong the tie required to solve the issue.
- Communication between the INF 370 team; It is understandable that not all attempts of communication will be acknowledged as the INF 370 team faced their own adversities during the 2021 academic year. Our team felt like we had to walk on eggshells when communicating with the lecturers and this resulted in a misunderstanding of issues our team faced.
- Internal communication, our team would have to neglect communication due to the sheer workload of this deliverable. We would always reply just not in a timely manner.

6.1.4 Time Management

Our team struggled with managing the allotted time for this deliverable. Our system is quite large and we were required to add the missing functionality mentioned in the scope creep section Which only compounded this issue.

6.1.5 Team Dynamics

Our team faced a situation where no team would want to find itself. We had to remove one of our team members. The other four members of the team approached the lectures on several occasions to try address the issue from Deliverable 1. However, the issues seemed to persist even after providing support. Unfortunately, this in turn impacted the team's marks. This ordeal was extraordinarily disruptive and it is still completely mentally draining.

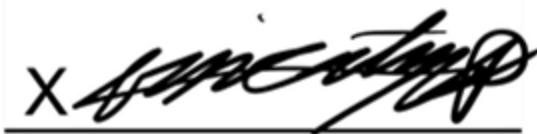

6.2 Team sign-off

We, the members of Team 7 of INF 370 2021, declare that we are satisfied with the quality and professionalism of the contents contained in this document. We declare that each member of the team has made an equal contribution.

Conclusion

This section covered the issues the Paralinear team faced during deliverable 5, 6 and 7. These issues have been acknowledged by the team with the team sign off.

Complexity

Introduction

The complexity marks document indicates the level of complexity the proposed system for Gohvan construction will have and feature. All the required complexity marks listed must achieve a total score of above 100 points for a four-man team and must be maintained throughout the project lifecycle and finished product.

7. Complexity requirements

Topic	Level	Marks MAX	
1. Special GUI	For online applications: Responsive web design For desktop applications: Form design according to design principles (Schneiderman's golden rule on navigation applies here)	3	42
	Appropriate use of grids/tables	3	
	Appropriate use of tabs/links	3	
	Use of graphs in an appropriate business context	4	
	The storage and display of graphical information, like photos with a good business reason	3	
	Working e-mail automatically generated from the database in an appropriate business context	2	
	SMS messages automatically generated from the system in an appropriate business context	2	
	Extensive user-friendly search facility	3	
	At least one use of a tree to display data from the database	3	
	Able to dynamically modify a data tree structure and in doing so adjusting the data in the database	4	
	At least one use of a calendar view of data (not a date/time picker; not a plug-in such as Google calendar)	3	
	Uploading a file into the system with appropriate business reason	3	
2. Database access	The use of audio/video in an appropriate business context	3	15
	At least one use of an administrator configurable timer in an appropriate business context	3	
	At least 30 tables used (4 member groups) or 40 tables used (5 member groups)	6	
3. Reports	Full referential integrity on all tables	6	
	At least one use of master-detail table relationships (Schneiderman's golden rule on system status applies here)	3	
3. Reports	At least 3 simple list reports in a reporting tool (no control breaks, no graphs, single table)	3	15

	At least 2 transactional report with 2 or more control breaks (with heading and calculated values/totals, multiple tables)	6	
	At least 1 report with adjustable criteria	3	
	At least 1 management report using a graph	3	
4. Flexibility	All data that can change in future should not be hard coded but maintained in a sub-module of the system (e.g. Lookup tables)	6	12
	Some business rules are not hard coded but maintained in a sub-module of the system.	6	
5. Error handling	All system-generated errors are trapped, and consistent, user-friendly error messages are displayed	6	12
	Appropriate data validation on all input fields	6	
6. Help	At least one menu item or other control that opens up a complete help document (HTML, PDF, Help-file)	3	15
	Extensive context-sensitive help. E.g. calling Help on a specific screen/function will automatically open the specific help for that screen/function.	6	
	Search Facility on Help	3	
	Extensive use of hints	3	
7. Security	Logon screen with user ID and password and fixed user profiles	3	13
	Applying two factor authentication with applicable business reason.	3	
	Encrypted passwords in database	*	
	Flexible user profiles (i.e. you can dynamically add user profiles that will enable/disable access to certain parts of the system)	6	
8. Audit Trail	An audit trail of all transactions in the system showing at least date, time, user, transaction type, critical data (such as amount and quantity of transaction)	6	9
	Able to search the audit trail on any of the following: date, user, transaction type	3	
9. Deployment	For a desktop application: Fully functional installation disks that take care of application installation requirements (install and uninstall)	3	15
	For an online application: Deployment of application to a publicly accessible web server	3	
	For a mobile application: Deployment to an App Market place (such as the PlayStore or the AppStore)	6	
	Deployment of the database to a remote database server	3	
10. Backup and Restore	A backup and restore subsystem exists that backup/restore all data (system may exit during restore)	3	3
11. Import/Export Data	Able to open Word or Excel and automatically place data in it based on the parameters provided (with a good business reason)	6	9

	XML or JSON: At least 1 XML or JSON file for Importing or Exporting of data (with good business reason)	3	
12. External INPUT device	Simple Link to an external INPUT device using plug-and-play technology, such as a swipe card reader, bar code reader, etc. or a native component such as a QR reader, a GPS component, etc.	3	18
	Loose Link to an external INPUT device using device specific software. Data or images must seamlessly be stored in the database, but device specific software is visible to the user. (This could include a digital camera, scanner, voice recording device, thumb print reader, etc.)	6	
	Tight Link to an external INPUT device using device specific software. Data or images must seamlessly be stored in the database, but device specific software is not visible to the user. (This could include a digital camera, scanner, voice recording device, thumb print reader, etc.)	9	
13. External APPLICATION / Services	Integrate an existing web service into your application (with good business reason)	3	9
	A fully functional link to an installed external application system exists and the interface must be shown to work on the external system. Note that this excludes Microsoft Office Applications	6	
14. Multiplatform processing for an appropriate business reason	Appropriate business use of static views on an alternative platform.	3	27
	Appropriate use of dynamic views on an alternative platform (i.e. data is displayed from the system's database)	3	
	Appropriate use of substantial dynamic views on an alternative platform (i.e. both reading and writing data from the system's database)	9	
	Uploading a file through an alternative platform onto the system's database.	3	
	Substantial processing on a third platform (i.e. both reading and writing data from the system's database)	9	
15. Programming Principles	The use of a data layer to facilitate interaction between your database and your business layer	3	12
	The use of an API to facilitate interaction between your business layer and your presentation layer	6	
	Comprehensive use of stored procedures and/or triggers and/or jobs.	3	
16. Innovative addition to the system	Any very advanced innovative addition to the system (e.g. machine learning, AI, block chain, text mining, IoT, etc.)	1 - 9	9

Maximum Complexity Marks

222

Total Calculated Complexity Marks

102

Conclusion

This concludes the complexity mark section for Team 7 which has been filled out as to the sections we can complete with this current system design.

Sign-off by Client

Introduction

This section serves as proof that the client has read through the deliverable presented and agrees with the content and work that has been provided

8. Sign-off by client

X
Michael Van Der Walt
Director

By signing this document, the client verifies that the deliverable 4 and content provided within are acceptable, up to standard and relates to the business solution proposed from the Project proposal.

Conclusion

This concludes the Client sign off section and the client signature is present indicating that the work is acceptable and relates to the business solution that was proposed.

Deliverable Conclusion

This concludes deliverable 06. Deliverable 06 consists of the complete system documentation for our INF 370 project. This complete documentation includes: Deliverable 00 (Team & Client Information), Deliverable 01 (Project Proposal), Deliverable 02 (Functional Specification), Deliverable 03 (System Prototype), Deliverable 04 (Technical Specification) and Deliverable 05 (Gohvan Construction System). This deliverable covered the validation, Crud Matrix, Conversion Plan, Project related issues, Complexity matrix. Deliverable 06 helps consolidate and conclude the System Documentation.

Appendices

Introduction

This section of our deliverable holds the appendices of the document. The appendices will include the CRUD matrix.

9. Attached Appendices

The following appendices accompany this deliverable.

Appendix	Document Title	Document Contents
A	Appendix A - CRUD Matrix	This appendix will contain the CRUD Matrix

Conclusion

This section of our deliverable held the appendices of the document.
